Atty. Dkt. No. 030481-0212

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently amended.) An indicator device for visually indicating a pressure of blood inside a blood vessel, comprising:

a body comprising a passage passing through the body, the body further comprising a duct extending in the body and having a hemostatically sealed blood accommodating chamber;

an insertion tube comprising a distal end portion adapted to be positioned inside the blood vessel and comprising a fluid communication pathway between a liquid inlet opening near a distal end of the insertion tube and the duct; and

a window comprising an at least semi-transparent section configured to enable visual observation of blood entering into the duct via the inlet opening when the inlet opening is located inside the blood vessel; and

an elongated member;

and wherein the passage and the fluid communication pathway are adapted to permit a the elongated member to be threaded in a substantially straight path there through between a distal end and a proximal end of the indicator device.

2. (Cancelled.)

3. (Previously presented.) The device as claimed in claim 1, wherein the duct opens into the chamber via an aperture having a spill-over edge, the aperture being located at a level above a bottom surface of the blood accommodating chamber, whereby return flow of blood back into the duct is prevented.
